Dear Hiring Manager,

As a recent Flatiron School graduate, web technology enthusiast and guitar player / Fender Fan, I was excited to see your opening for the Software Engineer role at Fender. My recently-finished Software Development experience at Flatiron has sculpted my code evaluation and application development knowledge, and I know I have the Front End development skills including Node.js/Javascript, Ruby on Rails and Python skills to help Fender succeed in all upcoming Full Stack Development Projects.

During my enrollment at The Flatiron School, I developed numerous skills and strengthened existing abilities, all which would serve me well at Fender. My time at Flatiron honed my understanding for debugging and identifying issues, developing proficient, clean, scalable and optimized code. I added to that experience by becoming proficient in Typescript and NodeJS.

Several of my achievements while at The Flatiron School included:

- Coaching and mentoring prospect students, I was nominated several times by my coaches and lead instructors to carry out this task.
- Utilized cross functional teamwork to complete many projects where I gained the
- perspective of my leaders and peers.

I take great pride in the software development process work that I do. I also pride myself in being an ambitious and self-driven developer. I thrive at challenges and love to learn from others who have different perspectives than I. I have a deep enthusiasm for working in a fast paced environment while paying attention to detail and having excellent interpersonal communication skills. I am passionate about code I work with and love solving and understanding complex problems.

I would enjoy an opportunity to chat about your upcoming projects and plans and share with you how my education at The Flatiron School can be replicated and improved at Fender.

Sincerely,

John Reiner
